LOGNOTE -- Chief, Operations Group, 17 April 1984

1. [] Following from this morning's staff meeting:

25X1

--

25X1

--

- The President will break ground for the new Headquarters building sometime next month.
- The IG report on hiring of annuitants has been received. DD/S&T wants comments by the end of the week.
- OMS is getting very tough on overweight for TDY and PCS travel. Anyone 33 percent over the OMS weight scale will be disqualified. We hear the OMS weight scale is much more restrictive than that used by the insurance underwriters.
- Key Building will continue to have GSA guards until the Agency is prepared to take over all Key Building security, including the garage. GSA officers have arrest authority; Agency guards do not. DD/A is trying to get this authority.
- 28 April is Visitation Day. FBIS will be open for two hours. [] is coordinating with a representative from each group. If vaults must be opened someone must be on hand at all times. Safes should not be opened. Wangs should not be turned on or used to entertain children. Adults? B
- The BBC-FBIS Coordination Meeting will be 22-23 May.
- ISSG has been meeting with SDS on computer security for the field bureaus. They hope to have all this clarified shortly so the bureaus can be notified.
- The Key West housing proposal has gone to [] for final approval. He has a lot of other business to get to first.
- There may be some stretch out in INTERNET as a result of the FY-85 budget cuts, but we probably will not know until we see the DD/S&T figures. Some delay is the worst that is anticipated.
